

CHEERON Portable Rebar Threading Machine

奇隆手持式套丝机

Cheeron electric threading machine is suitable for threading various steel bars, with a threading range of 12-32mm. It is portable, weighing only 14kg. This machine is widely used in equipment installation, rebar threading in construction, etc.

Cheeron电动套丝机适用于各种圆钢的套丝，套丝范围:为12—32mm。它便于携带，重量仅14kg。此机器被广泛用于设备安装，建筑的钢筋滚丝等。

Machine Features 设备特点

- Compared with existing rebar threading equipment, this electric rebar threading machine is more portable, lightweight, and can be operated and moved by a single person with one hand.

与目前现有钢筋螺纹加工设备相比，这款电动钢筋螺纹套丝机更便携，重量轻，单人单手既可操作和移动。

- The machine effectively improves work efficiency, ensures construction quality, and reduces labor intensity. 机器可有效提高工作效率，保障建筑质量，减少工作强度。

- Matching round dies are specially designed for rebar threading machines. They are resistant to high wear and temperatures, producing clear and precise threads.

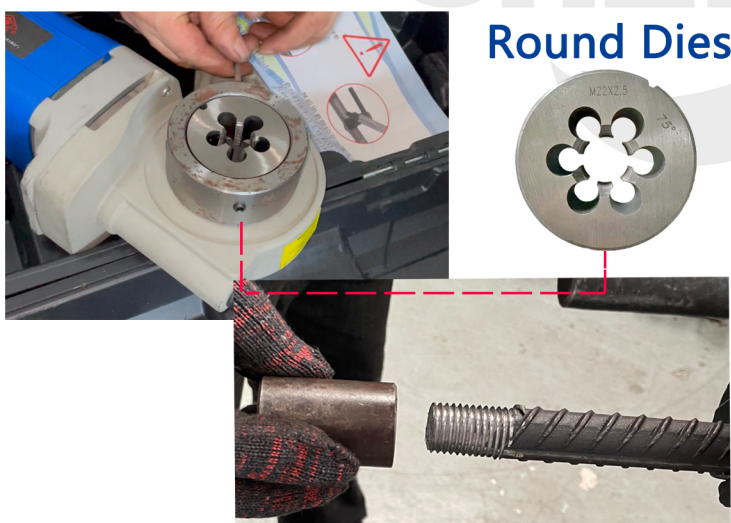

配套圆形模具专为钢筋螺纹加工机设计，耐高温耐磨，可加工出清晰精准的螺纹。

Specification 机器参数

Machine Name/机器名称	Portable Rebar Threading Machine/手持式钢筋套丝机
Rebar Processing Range/钢筋加工范围	12-32MM
Voltage/电压	220V/50HZ
Power/功率	3000W
Accessories/配件	Plastic box/ 塑料箱*1; Oil can/ 油壶*1; Clamp/ 夹具*1
Weight/重量	14kg
Dimensions/规格	63*32*15cm

Usage Steps 使用步骤

Round Dies

Open the box and take out electric thread rolling machine.

Place the round die into the machine.

Turn on the power and begin rebar threading.

Fix the clamp onto the steel bar
